Don't Take Your Kitchen Sink For Granite!

Whether it is a home remodel or a new construction, many architects, designers and homeowners are turning to nature for inspiration and timeless solutions. The unsurpassed, natural beauty of granite has endured throughout history, mainly serving as the luxury material of choice for modern-day countertops. Now, its warmth and elegance are being crafted into kitchen and bar sinks. Elkay

introduces its new Gourmet egranite, a family of granite silica and acrylic resin-formed sinks that bring a stylish piece of historical beauty and long lasting durability to one's home.

Whether the sink is featured as a focal point of a room or designed to harmonize within a seamless setting, the new e-granite sinks are a modern twist on old world charm, accentuating several design styles from popular contemporary to transitional. These sinks are available in black, white, biscuit, and now, mocha; the sink color is drawn through the entire sink during the coloring process so the vibrancy will not fade, even under heavy use, allowing the sink to retain its original look.*

The patented process is complicated, but the benefits are easy to see...

- Molded from up to 85% natural quartz and high performance acrylic resins*
- Extreme heat resistance – hot pots and grimy cookware are no match*
- Non-porous surface prevents stains, is hygienic and a breeze to clean*
- Hard enough to resist scratches and chips, but resilient enough to reduce breakage of glassware and fine dinnerware, unlike cast iron*
- Full benefit of Elkay's Limited Lifetime Warranty*
